Player Evaluation

Player _____ Team _____ Coach _____ Date _____

Instructions

All players, coaches, and families should have the opportunity to discuss a player's performance, their strengths, and opportunities for improvement.

This player evaluation is a document that should be used as a template to provide an action plan to each player so they can be in charge of their own development and improvement throughout their time in the program.

These scales represent the average for the age/group that your player is currently in. If your player recently moved up and is now the youngest player in a two grade team (for example, a 3rd grader on a grade 3 & 4 team) then your scores in this evaluation cycle may be lower than the previous season, when your player may have been a 2nd grader on a grade 1 & 2 team, because they are being compared with a different peer group.
